

## DOUGLAS FRANCHISES ARE MUCH DISCUSSED

PRIVILEGES ASKED FOR RAILWAY AND GAS PLANT ATTRACT ATTENTION.

Yesterday there was considerable discussion of the gas franchise and the street railway franchise, as asked for at the Monday night meeting of the city council. There is a general objection to the price named in the gas franchise, it being claimed that the price of \$2 per thousand feet is too high. Of course, many of the people of Douglas are not informed as to the cost of producing gas.

This morning H. B. Callisher and J. M. Sparks, of the proposed gas company, claimed that the price named in the ordinance was a very reasonable one. Mr. Sparks claimed that the price of gas here could not be expected to be as cheap as in Los Angeles, where the price of oil fuel was forty cents per barrel, while the price of oil, which is the cheapest fuel to be had in Douglas is \$1.40 per barrel; other expenses here in the operation of a gas plant and piping the city would be correspondingly high.

The railway franchise seems to be meeting with no particular opposition, though there will be those who will maintain that the street railway company ought not to be allowed to hold a franchise for a line on any street for a long time without making use of the privilege. It is understood that the company will not ask for anything unreasonable and that the ordinance was drawn to cover all the streets to meet any emergencies for further extension of the line in the near future. It is recognized and admitted by many that the extension of this line will be beneficial to this city.

Of course until the ordinances have been finally passed upon by the city council the people will not be fully informed as to what is proposed in the franchises, and cannot be accurately measured.

Franchises are the important things in all incorporated cities and the people of Douglas will no doubt examine all propositions asking for these privileges very closely.

## DOUGLAS PRESBYTERIANS HAVE CHURCH PROBLEM

PRELIMINARY PLANS OF NEW CHURCH HAVE BEEN RECEIVED BY REV. GEO. LOGIE.

How to build a \$10,618 church with \$9,000 is the problem which Rev. Geo. Logie, of the Presbyterian church in this city, was trying to solve this morning. Just what success will be reached in this undertaking cannot be definitely measured now, but judging by what the reverend gentleman has already accomplished in the matter of providing the Presbyterian church congregation in this city with a building for worship it is quite likely that the problem will be solved.

When Rev. Logie arrived in this city the problem of securing the erection of a Presbyterian church in Douglas was a much harder one than the one now up for consideration; the question six months ago was how to secure a church building with no money at all in the church treasury; now there is \$9,000 available cash for the church, but the preliminary plans received to day from S. W. French, who is in Los Angeles calls for a \$10,618 expenditure. The plans show a beautiful building and the sketch was drawn and the estimates of cost made by Dennis & Farwell, architects, of Los Angeles. Mr. French is one of the building committee of the church and during his visit to Los Angeles was commissioned to secure plans for submission to the other members of the committee.

The plans received this morning are being examined today by all concerned and it is likely that they will be adopted practically as they are, as some of the work can be omitted for the present and arranged for later, as for instance the art glass called for in the windows and the number of seats and pews may be cut down for the present.

It is expected that the new Presbyterian church will be under way by the middle of September and it is hoped that it will be completed by the first of the new year. It will occupy the corner of the church block at Tenth street and D avenue and will be a slightly structure to further ornament Douglas.

Reception at Church—The reception at the Methodist church last night, as a welcome to the new pastor, Rev. I. L. Oakes, was a splendid success. Several of the local pastors were present and the congregation and Methodist friends were represented by a large attendance. After some welcoming remarks and a general felicitation, in which all took part, informally, refreshments were served and the reception was not concluded until near 11 o'clock.

Opens Tomorrow—The new management of the New York Fair store will open that establishment tomorrow morning for business. The gentlemen in charge have been receiving and displaying their goods for the past week and have distributed many thousands of bills announcing their opening sale, besides using a very liberal amount of printers' ink. The New York Fair are out for trade and are offering goods at astonishingly low prices.

## THE Y. M. C. A. CONTRACTOR AND CARPENTERS UNION

LOCAL CARPENTERS DECLARE AN UNFAIR ORDER ON THE Y. M. C. A. BUILDING.

For some time the local carpenters have been objecting to the manner in which the work was being done on the Y. M. C. A. building and during the past week there has been considerable talk about the contractors refusing to pay the union scale or work the hours prescribed by the union on the job.

It seems that Mr. Stewart, the contractor, was interviewed by the union representatives soon after the work began and requested that he pay the regular union wages and work the union hours on the building. According to Mr. Stewart, he informed the walking delegates who called upon him that the Y. M. C. A. building was not a union job, but afterwards Mr. Stewart says that he adopted the union scale of wages and the hours and has been paying \$4 per day for carpenters for eight hours' work.

In another column will be found a card from the union setting forth their side of the controversy. This morning the International-American representative called upon Contractor Stewart and asked him for such information as he might feel disposed to give out for publication. Mr. Stewart was not inclined to treat the matter seriously, saying that while he had regretted that the union had declared the work unfair he did not anticipate that the action would interfere with the progress of the work.

"This trouble grows out of the fact that we are working two Mexican laborers on the job for less than the union scale; these men are not competent to earn carpenters' wages and are mostly engaged in carrying lumber and other material on the building and at such times as there is nothing else for them to do they are put to such rough carpenter work as they can do."

"On Monday last the union caused one of their members to quit the job, as I understand because of the employment of the Mexicans at less than the carpenters' scale of wages. The man who quit is named Milican and I understand that he is now working at the Copper Queen smelter, where the wages are same as he was receiving here, but the hours are two more than he was worked on this building."

Mr. P. P. Kelly, who has charge of the building as superintendent of construction for the Christian association, corroborated what Mr. Stewart said in regard to the Mexicans employed on the building and what kind of labor they performed.

Mr. Stewart stated this morning that he would have no trouble in securing all the men he needed on the work. A prominent carpenter in Douglas this morning stated that he believed there were none of the Douglas union carpenters at work on the building and that the trouble was not in the nature of a strike, but an attempt of the union to maintain wages and hours of work, according to the union scale.

Entertained Thirteen Club—Dr. and Mrs. Armstrong entertained the members of the Thirteen club last evening at their cozy cottage on Tenth street. The rooms were tastefully decorated with ferns and potted plants and the club colors. A guessing contest was indulged in and each member showed his ability, Harry Fleming winning the first prize, a handsome scarf pin, skull design, and Wash. Smith the booby—a lone cigar. The mandolin club gave some lovely selections, Rattlebones, Graveyard Shuffle and others. At midnight a dainty lunch was served in the dining room by Mrs. Armstrong, who showed her ability in a most charming manner. Appropriate place cards and a carnation was presented each guest and long past the thirteenth hour the boys departed after many compliments were paid to their host and hostess, Dr. and Mrs. Armstrong. Dr. Armstrong was a Thirteen club member at Toronto, Canada.

Payday Tomorrow—The payday season for this month begins tomorrow, when the men employed by the C. & A. will receive their monthly checks. Merchants are already beginning to display rare bargains for the payday.

Will Wed.—It will be noted in the news from Tombstone today that John Imiland has secured a license to wed Florence Gertrude Anderson, of this city. Mr. Imiland has a very sly way in carrying on this matrimonial business, but it is not unlikely that the boys will be there with a warm reception after the ceremony is performed.

## MEN ARE POWERLESS

To Fight Against Disease Unless They Strike at the Underlying Cause.

To treat Dandruff, and Falling Hair with irritants or oils on which a parasitic germ will prosper, is like scooping water from the ocean to prevent the tide from rising.

You cannot accomplish a satisfactory cure without having a right understanding of the fundamental causes of the trouble.

You must kill the Dandruff Germ. Newb's Herpicide does this because it is specially made to do that very thing. When the germ is removed, the hair has no choice but to resume healthy growth and beauty.

Destroy the cause, you remove the effect. Sold by leading druggists. Send for stamps for sample to The Herpicide Co. Detroit, Mich.

For sale by Bisbee Drug Co.

## Cure For The Blues

ONE MEDICINE THAT HAS NEVER FAILED

Health Fully Restored and the Joy of Life Regained

When a cheerful, brave, light-hearted woman is suddenly plunged into that perfection of misery, the BLUES, it is a sad picture. It is usually this way: She has been feeling "out of sorts."

for some time; head has ached and back also; has slept poorly, been quite nervous, and nearly fainted once or twice; head dizzy, and heart-beats very fast; then that bearing-down feeling, and during her menstrual period she is exceedingly despondent. Nothing pleases her. Her doctor says: "Cheer up; you have dyspepsia; you will be all right soon."

But she doesn't get "all right," and hope vanishes; then come the brooding, morbid, melancholy, everlasting BLUES.

Don't wait until your sufferings have driven you to despair, with your nerves all shattered and your courage gone, but take Lydia E. Pinkham's Vegetable Compound. See what it did for Mrs. Rosa Adams, of 819 12th Street, Louisville, Ky., niece of the late General Roger Hanson, C.S.A. She writes: "Dear Mrs. Pinkham:—"

"I cannot tell you with pen and ink what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered with female troubles, extreme lassitude, 'the blues,' nervousness and that all-gone feeling. I was advised to try Lydia E. Pinkham's Vegetable Compound, and it not only cured my female derangement, but it has restored me to perfect health and strength. The buoyancy of my young days has returned, and I do not suffer any longer with despondency, as I did before. I consider Lydia E. Pinkham's Vegetable Compound a boon to sick and suffering women."

If you have some derangement of the female organism write Mrs. Pinkham, Lynn, Mass., for advice.

Monte Visto—Chas. Hanson has just returned from the Monte Visto gold and silver mine, fourteen miles east of Cos. The development work which was started by Mr. Hanson on this property one month ago is progressing satisfactorily with a force of from twelve to fifteen men. The present work is in tunnel which has run 140 feet; three shafts are kept on the work. When the tunnel reaches a length of 250 feet it is expected that the vein which crops out across the surface of the property will be cut. From the character of the ore exhibited by Mr. Hanson to a few of his friends it may be expected that the Monte Visto will at an early day become an important producer and supply Douglas with an increased trade from Sonora, as well as profit to its owners.

Col. Johnson Sick—Col. D. H. Johnson is confined to his room today, threatened with fever. Whether his ailment will develop into typhoid cannot yet be determined, but Dr. Armstrong this morning advised that his condition was such as to demand that he remain away from business. The many friends of the colonel will wish that he may be at his place of business tomorrow.

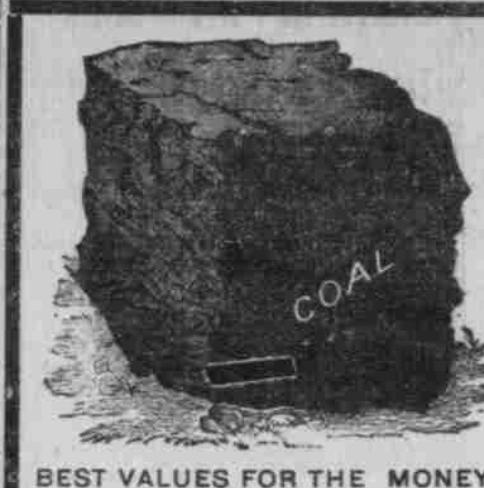

Out for First Time—Oscar Fisher, of the San Bernardino market, who has been in the Calumet hospital for six weeks, suffering with typhoid fever, was today able to walk out on crutches for the first time. After the fever had practically left Mr. Fisher he was attacked with inflammatory rheumatism. He will start for the hot springs in Graham county as soon as he is able to travel that far.

Water Was Scarce—This morning there was a scarcity of water in the tank from which the engines get their supply at the shops. The scarcity was caused by someone leaving the pipe open which connects with the tank. It was estimated that 125,000 gallons of water was lost. There was no delay of any of the trains on account of the accident, but it took the last available drop to supply the engines going out this morning.

Cal Cox, a cattleman from Cananea, spent yesterday in town.

For Kidney & Bladder troubles, Cures in 48 Hours, URINARY DISCHARGES. Each Capsule bears the name S. MIDY. Beware of counterfeits.
